KEMO JATTA
Technology-focused professional | SaaS Platforms, Customer Support, Cybersecurity
Chicago, IL | 678-702-6838 | kemo.jatta@ymail.com | linkedin.com/in/kemojatta

SUMMARY

IT Support professional with hands-on experience troubleshooting SaaS platforms and resolving technical issues across Windows, Linux, and cloud environments. Brings CompTIA Security+ and AWS Cloud Practitioner certifications plus graduate-level cybersecurity training. Skilled in Active Directory concepts, VPN configuration, network fundamentals (TCP/IP, DNS, DHCP), and documenting solutions in ticketing systems like Salesforce.

EXPERIENCE

Intuit – Account Executive, Mid-Market – [Atlanta, GA]
Jul 2026 – Present

- Identify customer technology requirements, software challenges, and operational needs through structured discovery and problem analysis.
- Collaborate with internal technical and product specialists to investigate customer concerns, coordinate escalations, and communicate potential resolutions.
- Document customer interactions, software requirements, and follow-up activities in Salesforce to maintain accurate records and support continuity.

Square (Block) – Account Executive – [Atlanta, GA]
Mar 2025 – Aug 2026

- Assisted business customers in evaluating payment technology, point-of-sale software, and integration requirements based on operational needs.
- Investigated customer-reported concerns, coordinated with technical specialists, and communicated resolution steps to support customer satisfaction.
- Achieved 299.2% lifetime quota attainment while managing multiple customer relationships, competing priorities, and technology-related discussions.

Square (Block) – Business Development Representative – [Atlanta, GA]
Jan 2024 – Feb 2025

- Gathered customer technology requirements, documented operational challenges, and identified appropriate SaaS platform capabilities.
- Managed high-volume customer communications, maintained accurate Salesforce records, and prioritized time-sensitive requests.
- Achieved 115% quota attainment and served as BDR Captain, supporting workflow improvements, process documentation, and team knowledge sharing.

UserTesting – Business Development Representative – [Atlanta, GA]
Mar 2022 – Jan 2024

- Communicated SaaS platform functionality and assisted prospective customers in understanding software capabilities and technical requirements.
- Documented customer needs, maintained organized CRM records, and coordinated follow-up with internal stakeholders.
- Supported customer solution evaluations through clear communication, problem identification, and cross-functional collaboration.

SKILLS

Operating Systems: Windows fundamentals, Linux fundamentals, operating system security concepts
Networking: TCP/IP, DNS, DHCP, VPNs, firewalls, routers, switches, network troubleshooting fundamentals
IT Support: Technical troubleshooting concepts, issue documentation, problem analysis, escalation coordination, customer support
Identity and Access: Authentication, authorization, multifactor authentication, role-based access control, least privilege
Cloud Computing: AWS EC2, S3, IAM, VPC, CloudWatch, cloud infrastructure fundamentals
Security: Endpoint security concepts, vulnerability management fundamentals, security policies, access control
Business Software: Salesforce CRM, SaaS platforms, customer relationship management tools
Professional Skills: Technical communication, documentation, time management, prioritization, cross-functional collaboration

EDUCATION

Master of Science in Cybersecurity
Kennesaw State University | Expected 2027

Bachelor of Science in Biology
Georgia State University | [2022]

Associate Degree in Cybersecurity
Georgia Piedmont Technical College [2025]

PROJECTS

IT Infrastructure and Networking

- Studied TCP/IP networking, DNS, DHCP, VPNs, firewalls, operating systems, and network security fundamentals.
- Examined principles of authentication, authorization, multifactor authentication, access control, and system protection.
- Developed foundational knowledge of cloud computing, virtual infrastructure, storage, and networking through AWS certification training.

Information Security Risk Assessment – Kennesaw State University

- Evaluated system vulnerabilities and information security risks using structured likelihood-and-impact assessment methodologies.
- Documented risk assessment findings, proposed security controls, and residual risk evaluations.
- Applied NIST risk assessment principles to evaluate system protection requirements and recommend risk mitigation strategies.

CERTIFICATIONS

CompTIA Security+ | CompTIA | Oct 2025
AWS Certified Cloud Practitioner (CLF-C02) | Amazon Web Services | Oct 2026
